DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11, 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Tandy, Jr. et al. (5,651,561).

Tandy, Jr. discloses a longitudinally extending radius arm 12 and an axle 14 having a central axis, the combination comprising an axle tube; a connection structure via 66 secured to the axle tube; an elongated body; a frame connector 18 at a first end of the body; an axle connector (see figure 3) at a second end of the body; a pair of bushings 20, 28 secured to the connection structure and to the axle connector, the bushings being disposed on the same fore-and-aft side of the central axis of the axle and being vertically spaced relative to each other. The body and axle connector are disposed on one side of the axle and do not extend longitudinally beyond the central axis of the axle. The frame connector includes a bushing that has a central bore for receiving a fastener that is adapted to connect the first end of the body to the frame of the vehicle.

Allowable Subject Matter

3. Claims 1-10 are allowed.
4. Claims 13, 14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
